More choice for iPod video clips

One of the world's leading entertainment industry databanks has announced that it is to make an even wider choice of video clips for iPod users.

Showfootage.com offers owners of Apple iPod Video a range of video clips to stylishly customise your iPod.

Ranging from live clips to computer animated scenes, the selection is ideal for adding a personal touch to your iPod.

The service can be used without a subscription, and even offers a free "clip of the week" available via the iTunes online store.

Matthias Finke of **Showfootage.com** said: "Our expanded range of clips enables iPod owners to use the video function on their new device not only for music videos, but also to integrate their personalised iPod into their lifestyle. The clips can be used as screensavers or background images."
